

Owoeye Joshua

Software Developer

Owoeye Joshua Pelumi - [Lordify](#)

Lagos, Nigeria

[GitHub](#) - [X](#) - [Mail](#) - [Whatsapp](#)

About

Creative and solution-driven software developer with 1+ years of hands-on experience in building responsive web applications using Laravel, React, and modern JS frameworks.

Passionate about crafting digital experiences that are both functional and impactful.

Strong believer in Christ. Lover of clean code, creativity, and eFootball.

Skills

FRONTEND - Html, Css, React, Bootstrap, Tailwind CSS

BACKEND - PHP, Laravel, Node.js

OTHERS - MySQL, Firebase, Git, APIs, Web3 (RainbowKit, Wagmi)

MISCELLANEOUS - Video editing, Graphics Designing, Creative Writing, CHATGPT

Experience

[JAB Digital Technologies](#) / Software Developer

APRIL 2024 - PRESENT, NIGERIA

Joined as a fullstack developer and worked closely on end-to-end development for client-based projects.

Responsibilities include building core features, fixing bugs, and maintaining deployed systems.

Projects:

i. [Glowcreators](#) - Ecommerce Platform - 2024

ii. [IPPA](#) - Member Onboarding App - 2024

lii. [JAB POS](#) - POS & Store Management System - 2025

[iFocus](#) / Website Manager & Developer

AUGUST 2024 - PRESENT, NIGERIA

Engaged via Upwork to provide urgent bug fixes. Delivered results quickly and was retained for ongoing updates and site maintenance

Ongoing collaboration involving feature enhancements, bug resolutions, and maintenance.

Education

[Moat Academy](#) / Web Development

OCTOBER 2023- JANUARY 2024, NIGERIA

Learnt Software Development at Moat Academy in 2023/2024 and have been actively learning since then

Came out as a Web Developer, now a Software Developer due to my acquisition of knowledge in various areas of Programming.

Projects

[GlowCreators](#) / Ecommerce Platform / Web Application

APRIL 2024- JULY 2024, NIGERIA

PROBLEM

The client needed an online store similar in function to Selar but fully custom-built (not a clone). The platform had to enable digital and physical product sales for creators in a clean, user-friendly interface.

SOLUTION

Developed a complete e-commerce web application with user registration via Email or Google, product listings, shopping cart, secure checkout using [Squad](#) Payments, and a live chat system for merchant-customer and merchant-admin communication. Integrated admin dashboards, real-time currency conversion between USD and NGN, and a currency rate checker.

TECHNOLOGIES

Laravel, Bootstrap, JQuery, MySQL, Google Console

[IPPA](#) / Onboarding Application / Web Application

AUGUST 2024- SEPTEMBER 2024, UNITED KINGDOM

PROBLEM

A UK-based pharmaceutical organization needed to digitize their member onboarding process. They wanted an online hub to display organization info, host resources (books, docs), and manage events — all accessible to verified members.

SOLUTION

Created a secure web application with a gated user registration system (for pharmaceutical professionals only), requiring admin approval before proceeding to GoCardless-powered membership fee payment (£100). Implemented a resource library, event scheduler with filters and “add-to-schedule” features, and an admin panel to manage users, content, and subscriptions.

TECHNOLOGIES

Laravel, Bootstrap, JQuery, MySQL

[PhiFinance](#) / Portfolio Website / Website

OCTOBER 2024- OCTOBER 2024, NIGERIA

PROBLEM

The client needed a simple, informative website to explain their mission and services, with plans to evolve into a full web platform for startups and investors.

SOLUTION

Built a responsive portfolio site showcasing PhiFinance's objectives and future plans. The upcoming update (in progress) includes user registration, startup pitch deck uploads, investor filtering, and automated pitch analysis with actionable feedback.

TECHNOLOGIES

Laravel, React, TailWind CSS, Bootstrap, Javascript, Typescript, MySQL

JAB POS / POS & Store Management System / Web Application

JANUARY 2025-MAY 2025, NIGERIA

PROBLEM

The client was using a legacy Store Management System built with Binary as a desktop application. While it served large enterprises, it was inaccessible for small-to-mid-sized stores due to its complex setup and offline nature. They wanted to modernize the system by rebuilding it as a web application — accessible from anywhere, easier to deploy, and more affordable for smaller retailers.

SOLUTION

Designed and developed a full-featured, modern web-based POS and store management system. Key features included multi-store setup, user registration, admin dashboard, user roles per store, real-time POS interface, receipt printing/generation, license management with activation guards, expense and purchase tracking, and barcode scanning. The system was built to scale from small shops to larger operations with ease.

TECHNOLOGIES

Laravel, React, TailWind CSS, Bootstrap, Javascript, Typescript, MySQL

Faeces AI / Web3 AI Info Website / Web Application

APRIL 2025-MAY 2025, NIGERIA

PROBLEM

The client needed a branded portfolio site for their Web3 AI product — an AI assistant designed for use in crypto/Web3 spaces, with future Twitter/X integration (similar to Grok).

SOLUTION

Developed a modern, fully responsive website with animated sections introducing the project, explaining its goals, and teasing future updates. Currently building out the web app phase featuring Web3 wallet support, X integration, and crypto-focused AI prompting.

TECHNOLOGIES

Laravel, React, TailWind CSS, Bootstrap, Javascript, Typescript, MySQL
